*Inclusive in the TER of 4.40%, a performance fee of 1.57% of the net asset value of the class of Financial Product was recovered. Our fee has increased by 0.39%, our expectation is therefore that the TER will increase or decrease depending upon any future performance fees charged. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction costs are a necessary cost in administering the fund and affects fund returns. It should not be considered in isolation as returns may be affected by many other factors over time including market returns, the type of fund, the investment decisions of the investment manager and the TER.

Effective Annual Cost:

The Effective Annual Cost (EAC) is a measure, which has been introduced to allow you to compare the charges you incur and their effect on investment returns when you invest in different financial products. It is expressed as an annualised percentage. The EAC is made up of four components, which are added together, as shown in the table below. The effect of some of the charges may vary, depending on your investment period. The EAC calculation assumes that an investor terminates his or her investment in the financial product at the end of the relevant periods shown in the table.

Effect of charges	1 Year	3 Years	5 Years	10 Years
Investment management	4.4%	4.4%	4.4%	4.4%
Advice	2.0%	0.7%	0.4%	0.2%
Administration	0.0%	0.0%	0.0%	0.0%
Other	0.0%	0.0%	0.0%	0.0%
Effective Annual Cost	6.4%	5.1%	4.8%	4.6%

All calculations include value-added tax (VAT) at the prevailing rate, where applicable.

Performance Fee: If the Fund underperforms the Fee Hurdle, then no fee is accrued until the high-water mark is again reached. The performance fee is accrued daily, based on daily performance, and paid to the manager monthly. If the Fund underperforms the fee hurdle, then accrued performance fees are refunded to the Fund at the sharing rate. The Performance Fee is equal to 10% of the total amount by which the Net Asset Value per Participating Share as at the relevant Performance Date is greater than the High Water Mark. The High Water Mark is the Net Asset Value per Participating Share at which a Performance Fee was last paid, net of the Performance Fee. The High Water Mark will be re-set at close of business on the last valuation point of the calendar year to the valuation of the Cell at that date and thereafter be adjusted as above throughout the coming year.
